<input type="checkbox"/> Super Grip	\$370.00/pair	X    _____	=    _____
For questions about the differences between the Natural-Fit and the LT or the Standard and Super Grip options, please see the Natural-Fit brochure, visit <a href="http://www.thenaturalfit.com">www.thenaturalfit.com</a> , or call us at 480-833-1834.			Shipping (\$12.00/Pair) = _____
			<b>Grand Total</b> = _____

**To complete your order, we need information about the wheels on which the Natural-Fit Handrims will be mounted. Please answer each of the following:**

1. **Wheel Size:**    \_\_\_ 22" Wheel    \_\_\_ 24" Wheel    \_\_\_ 25" Wheel    \_\_\_ 26" Wheel
2. **Wheel Type:**    \_\_\_ Standard Spoke    \_\_\_ Mag    \_\_\_ Spinergy    \_\_\_ X-Core
3. **Mount\*:**    \_\_\_ 6-Point Tab    \_\_\_ 6-Point Rivet Nut (e.g., Quickie)    \_\_\_ 7-Point Rivet Nut (For 24" Invacare Mag)    \_\_\_ 8-Point Rivet Nut (For 24" Skyway Mag)

**Notes:** 1) The Natural-Fit does not fit wheels with 4 or 9-point connections. 2) For flat free or solid insert tires on wheels with Tab attachments, the Natural-Fit must be installed prior to the flat free tires. 3) You cannot install on Quickie Mag Wheels ordered without a handrim ("handrim delete") -- they will not have the necessary standoffs on the wheel. Always order mag wheels with the handrim then remove it to install the Natural-Fit.

**\*The difference between Tab and Rivet Nut Attachments:**

**Tab Attachment:** Connecting screws go perpendicular to the wheelchair axle into the wheel rim and through flat tabs on the handrim (Photo #1). Most spoke wheels (*except standard Quickie wheels*) and Spinergy use a tab mount.

**Rivet Nut:** Connecting screws go parallel to the wheelchair axle into plastic round spacer sleeves (Photo #2) as with Mag, X-Cores, and standard Quickie Wheels (*Quickie Performance and Quickie 26" wheels use a tab mount*).

1. Tab                      2. Rivet Nut
